

Blue Coat Church of England Academy

Year: 9

Subject: Automotive Studies

Overview

This course is designed to introduce pupils into the world of the international automotive industry and explore the diversity of roles that exist within it. This taster hopes to excite the pupils to pursue Automotive Studies in KS4 and perhaps even as a career.

Initially pupils will learn about Health and Safety standards in the UK and its importance and legal perspective. Pupils will be introduced to an Automotive workshop environment within school and learn basic tasks first hand. Theory lessons will underpin practical tasks and cross curricular links with Mathematics and Science will be exploited.

With pupils being new to the automotive learning environment they will be actively encouraged to read magazines, Haynes manuals and watch relevant car related television programmes to help them understand key concepts and terms.
